## PERFORMANCE

Sound  
Absorption  
EN ISO 354 &  
EN ISO 11654

METALWORKS™ V-P500 Acoustic Baffles can significantly reduce background noise levels and reverberation times within spaces and enhance speech intelligibility. They provide absorption on all surfaces of the product either as a 'planar' absorber (w), when installed as a linear array; or as a 'discrete' absorber when installed as separate decorative elements.
